PROFESSIONAL SUMMARY

Full-stack software engineer with a Bachelor of Science in Information Technology, majoring in Software Engineering, and hands-on development experience built through freelance, academic, and personal projects. Skilled in designing, building, and deploying responsive web applications using modern languages, frameworks, and databases. Known for a structured, analytical approach to problem-solving and a strong focus on writing clean, efficient, and user-focused code. Adaptable, collaborative, and committed to continuous learning, with a track record of academic distinctions and a genuine interest in building practical solutions to real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, C#, JavaScript, TypeScript, Java, C++, Kotlin, SQL

Frontend Development: HTML5, CSS3, React.js, Bootstrap, Tailwind CSS, Responsive Web Design, UI/UX Design

Backend Development: Node.js, ASP.NET Core, PHP, REST APIs, API Integration

Databases: MySQL, PostgreSQL, MongoDB, Microsoft SQL Server, Oracle

Tools & Platforms: Git, GitHub, Visual Studio, Visual Studio Code, Android Studio, Android SDK, Anaconda, Firebase, XAMPP, phpMyAdmin

Cloud & Hosting: GitHub Pages, Netlify, InfinityFree, Supabase

Content Management Systems: WordPress

Development Practices: Version Control (Git), Testing & Debugging, Object-Oriented Programming (OOP), Responsive Web Development, Security Best Practices, Cross-Browser Compatibility, Accessibility (WCAG), Performance Optimization, Clean Code Principles, Documentation, Code Reviews

WORK EXPERIENCE

Freelance Full Stack Web Developer (Self-Employed)

Personal, Portfolio & Client Projects • February 2023 – Present • South Africa (Remote)

- Design, develop, test, and maintain responsive websites and full-stack web applications for personal, academic, and client projects.
- Build modern web applications using HTML5, CSS3, JavaScript (ES6+), React, PHP, SQL, Bootstrap, Tailwind CSS, Node.js, and REST APIs.
- Develop secure backend functionality, integrate databases including MySQL and PostgreSQL, and implement API integrations for dynamic applications.
- Optimise websites for performance, responsiveness, cross-browser compatibility, accessibility, and search engine best practices.
- Deploy and maintain web applications using GitHub Pages, Netlify, InfinityFree, Supabase, and other cloud hosting platforms.
- Use Git and GitHub for version control, code management, and collaborative development workflows.
- Troubleshoot bugs, implement new features, and continuously improve existing applications based on testing and user feedback.
- Work directly with project stakeholders to gather requirements, deliver high-quality solutions, and manage projects from planning through deployment.

PROJECT EXPERIENCE

A selection of personal, academic, and portfolio projects demonstrating practical full-stack and web development experience is presented below. Additional projects are available on my GitHub profile and portfolio website (see links above).

SADirectDeals — E-Commerce Platform

Feb 2025 – Jun 2025

E-Commerce Platform • Full-Stack Developer

A community-driven e-commerce platform connecting South African buyers and sellers through a secure online marketplace.

Technologies: HTML, CSS, JavaScript, Bootstrap, PHP, SQL, phpMyAdmin, XAMPP, InfinityFree, VS Code

Live demo: <https://sadirectdeals.great-site.net/?i=1>

SkyCast — Weather App

May 2026 – May 2026

Weather API Application • Backend Developer

A modern weather application delivering real-time weather updates, auto-location detection, and five-day forecasts for cities worldwide. Features dynamic weather-based backgrounds, dark/light mode, responsive design, and seamless API integration, demonstrating strong backend integration and user-focused UI/UX development skills.

Technologies: HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Bootstrap Icons, Google Fonts, OpenWeatherMap API, VS Code, GitHub Pages

Live demo: <https://carltonturusida.github.io/skycast-weather-app/>

Aurora Auth — Premium Animated Login & Signup UI

May 2026 – May 2026

Modern Animated Authentication Interface • UI/UX Designer & Frontend Developer

A futuristic, fully animated authentication interface featuring glassmorphism, neon gradients, smooth transitions, and immersive interactive effects, designed to deliver a premium login and sign-up experience inspired by platforms such as Stripe, Linear, Framer, and Apple.

Technologies: HTML5, CSS3, Vanilla JavaScript (ES6+), Bootstrap 5, Responsive Web Design, GitHub Pages, VS Code, Google Fonts, SVG Icons & Favicon, Glassmorphism UI

Live demo: <https://carltonturusida.github.io/aurora-auth/>

Aurevyn — Premium South African E-Commerce Frontend

May 2026 – May 2026

E-Commerce Frontend Platform • Frontend Developer

A premium South African e-commerce frontend showcasing a sleek, multi-page shopping experience with smooth interactions, responsive design, and a complete client-side shopping flow across curated fashion, electronics, and lifestyle products.

Technologies: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, UI/UX Design Principles, Netlify, VS Code, SVG Icons, Unsplash Images, LocalStorage API

Live demo: <https://aurevyn.netlify.app/>

Job Tracker — Smart Job Application Dashboard

May 2026 – May 2026

Smart Job Tracking Web Application • AI-Assisted Full-Stack Developer

A smart job tracking web application that helps users manage applications, monitor progress, and stay organised throughout the job search process.

Technologies: React 18, Vite, TypeScript, PostgreSQL, Tailwind CSS, HTML, SQL, Lovable Cloud, Supabase, Shadcn UI, React Router, React Query, Zod, Lucide Icons

Live demo: <https://carltonturusidajobtracker.lovable.app/>

Carlton Turusida — Personal Portfolio

Mar 2026 – Mar 2026

Personal Portfolio Website • Web Designer & Developer

A modern, responsive personal portfolio website showcasing my skills, projects, and professional growth.

Technologies: HTML5, CSS3, JavaScript, Bootstrap 5, Font Awesome, Google Fonts, Responsive Web Design, UI/UX Design, GitHub Pages

Live demo: <https://carltonturusida.github.io/my-portfolio-website/>

EDUCATION

Bachelor of Science in Information Technology (Software Engineering)

Eduvos, Pretoria, Gauteng, South Africa

Software Engineering Graduate — Graduated 14 May 2026 • Studied February 2023 – November 2025

Higher Certificate in Information Systems (Software Development)

Eduvos, Pretoria, Gauteng, South Africa

February 2020 – November 2021
